Why a Best Practices Strategic Alliance Workshop?

The Power of Best Practices In this Action Planning Workshop, you will learn how to achieve strategic objectives through alliances built on best practices and best process principles. You'll gain an alliance "Architecture of Success," including critical concepts, best practices blueprints, metrics, and systems frameworks. You'll also receive tips, techniques, and navigational aids for goal achievement.

By focusing on Best Practices, your alliance is assured of a very high chance of success and a far more rapid launch. In fact, a number of recent studies in the U.S. and Europe have shown that by using Best Practices in a disciplined manner, your alliance will have an 80% chance of success – about three times more likely to succeed than if you negotiated with traditional transactional-contractual approaches. This workshop will show how leading companies have produced dramatic improvements in their business using the best practices that will be revealed to you in this session.

What can I expect?

This is a practical "roll up your sleeves" program designed to focus on your company's core business opportunities. Bring your internal team, and even your most valued customers and suppliers – you will have the opportunity to redesign the value you create for each other.

Made me think, A great learning experience
Great Work! Well Organized
Completely Shifted my thinking
One of the best seminars ever attended

Who should attend?

Collaboration is a major competitive advantage. The program is built for upper and middle management, entrepreneurs, and leaders who are seeking to increase their proficiency in alliance building and want more marketing reach or innovation.

This session will prove to be highly useful for any business exec or manager that wants to grow their organization by connecting better with customers, sales channels, and development partners.

Workshop Goals

We provide the alliance practitioner with concrete, actionable ideas and tools that will be turned into powerful results. Your alliance team is encouraged to come as a group to the two-day session. Together they will design and build a new alliance (or rebuild an existing but less-than-satisfactory alliance). This Action Planning workshop uses a highly effective “dual track” approach:

Track One: a critical alliance concept is explained, followed by a best practice which will provide high success, and finalized with a practical “tool kit” to use in real life situations.

Track Two: then participants are given the task to apply the principles and practices and tool-kits to their real alliance situation, providing participants with an action-plan to finalize their experience

Participants immediately apply strategies, practices, and techniques that they can use in real life situations in their companies. Learnings result from concrete case examples, interactive sharing of ideas, and practical project development sessions.

When we looked to find the best advice in the alliance arena, we quickly learned why Robert Porter Lynch was most likely to be mentioned as the best in the field.

Our Approach to Capability Building

We design all our programs with the end result in mind: You want practical applications-- fast. Executives rate all seminars far more highly if three things are present:

1. The seminar was practical and directly applicable to my situation
2. I can use the material immediately
3. The seminar leader was knowledgeable, experienced, and responsive

Therefore, we focus all our executive programs on ensuring four key process steps are employed in the design and presentation of the seminar:

- ✓ The **Concept** is clear
- ✓ A **Best Practice** has been illustrated to bring the concept into a realistic framework
- ✓ A set of "**Tools**" (such as a checklist, process map, etc) makes the best practice useable in everyday practice.
- ✓ During the seminar, whenever possible, attendees are requested to **Apply** the concept, best practice, and tool kit to a **real-life situation** in order they gain immediate applicability (and consequently the longest term retention)

Objectives: Our ultimate value to your company is to produce results:

- Gain significant **Strategic & Economic Value** from your alliances
- **Select the Best Partners** with whom to ally
- **Shorten the Time** required to form an alliance
- **Increase the Success Rate** of your alliances
- **Negotiate** in a manner which positively impacts long term value & performance
- **Utilize Learnings** from each alliance across the spectrum of corporate operations
- **Receive Maximum Performance** from each alliance
- **Reduce the Risks and Increase the Rewards** from alliance
- **Enable Management of Multiple Alliances**
- Become the Alliance **Partner of Choice** in your industry

"Your teaching has made a profound influence in our development. Personally I use your book as a text book, road map, and bible. It still amazes me how true all the "essentials for success" have been for us! I wonder sometimes if our alliance would have just "fallen by the wayside" like so many others if we hadn't been made aware early on how important each of those blocks would be in achieving success."
